PARTNER BRIEF | DRAFT FOR DISCUSSION

Spayway

Learn it. Sell it. Grow together. A mobile-first learning, marketplace and community platform for students and young entrepreneurs in West Africa.

1. Vision

Spayway helps students and young people build skills and earn from real product sales, supported by a community of campus teams. The goal is a platform that lasts 5 to 20 years and serves 100,000+ members across Nigeria, Ghana and Francophone West Africa, with pricing in Naira, Cedi, CFA and USD.

2. The Three Pillars

Pillar	What members do	How Spayway earns
Learn (Academy)	Take short, mobile-friendly courses and earn certificates and XP.	Standalone course and certificate sales.
Sell (Marketplace)	Sell real products and digital goods online or in person. Log offline sales (cash, POS, transfer, mobile money) with a receipt reference.	Product margin on each sale.
Network (Community)	Invite friends, build a campus team, climb ranks.	Sponsored promotions and ads from members and vendors.

3. How Members Earn (Real-Commerce Model)

> **Principle:** every commission is paid from the margin of a real product sale. There is no guaranteed return on deposits and no income is promised.

- **Own-sales commission:** a rate set per product and shown upfront (the landing-page calculator uses an illustrative 15%).
- **3-level team commission (illustrative):** 5% on level 1, 2% on level 2, 1% on level 3, paid when team members make real sales.
- **Ranks:** Associate, Senior Builder, Executive Ambassador, unlocked by team size, course completion and verified sales volume.
- **Wallet:** commissions credit the member wallet. Minimum withdrawal is $15 (bank, mobile money or crypto), with fees shown before confirming. Peer-to-peer transfers and in-app purchases are supported.

Illustrative example

Input (per month)	Value	Result
Items sold personally	10 items at $30	10 x $30 x 15% = **$45.00**
Team sales (60% / 30% / 10% across levels 1-3)	$300 volume	$9.00 + $1.80 + $0.30 = **$11.10**
Estimated monthly commission		**$56.10 (about 89,760 NGN)**

Example only. Real earnings depend on actual sales and each product's commission rate.

4. Product and Membership Tiers

The earlier $30 / $50 / $120 / $350 tiers become **starter-kit or membership tiers**. Each bundles real goods and learning, not an investment.

Tier	Price (USD / NGN)	Contents (proposed)
Starter	$30 / 48,000	Student handbook, Course #1, referral link
Builder	$50 / 80,000	Courses #1-2, campus merch sample
Pro	$120 / 192,000	All courses, merch kit, ad credits
Hub	$350 / 560,000	Regional inventory box, VIP certificate, larger ad credits

Final contents and prices to be confirmed by the team. Names, prices and perks are proposals.

5. Platform Features

- **Landing page and app:** mobile-first, low-data, currency toggle (NGN, GHS, CFA, USD).
- **Offline sales workflow:** staff direct entry, or member claim with receipt reference and one-click approval by Finance.
- **Roles:** Super Admin, Finance Admin, Content Manager, Member.
- **Academy (LMS):** lessons, quizzes, certificates, XP.
- **Marketing module:** sponsored promotions, tracked links.
- **Scalability:** materialized-path referral tree for fast 3-level lookups, and an auditable ledger of every money movement.

6. Company Revenue Streams

Stream	Source
Product margin	Share of margin on marketplace and starter-kit sales after member commissions.
Sponsored promotions	Fees paid by members and vendors to promote products and events.
Courses and certificates	Standalone Academy sales.
Service fees	Withdrawal fee (3%) and peer-to-peer fee (1%), configurable.

7. Risks and Safeguards

Important: any model that pays members fixed daily returns funded by new sign-ups is unsustainable and is treated as a Ponzi scheme by regulators and payment providers. Spayway's public pages therefore make no guaranteed-return claims.

- Commissions only from real, verified sales. Offline sales need a receipt reference and Finance approval.
- Plain-language risk disclosure on every earnings page.
- KYC for withdrawals; audit trail for every transaction.
- No invented statistics or testimonials. Only real, consented member stories.
- Legal and regulatory review by the team's lawyers before launch (company registration number and licences to be added to the site).

8. Next Steps

1. Confirm the real-commerce earning rules (own-sales rate, 3-level rates, ranks).
2. Align the app dashboard and server engine with the confirmed model.
3. Finalise tier contents, pricing and supplier arrangements.
4. Complete legal registration, then run a pilot with one or two campuses.
